Understanding your device

Your SurgeShield® device is now installed. We recommend you occasionally check your device to ensure it is working properly, which can be completed with a visual check to see if the light is on. The best time to look is at night, as it can be difficult to see the light in the sunlight.

The SurgeShield device installed at your home is dependent upon the type of meter you have. Although the devices look different, each provides the same level of protection. Below are the pictures of each device and where you can find the light.

**Device 1**
Two lights located at the 3 o’clock position.

**Device 2**
One light located at the 3 o’clock position.

**Device 3**
One light located at the 3 o’clock position.

**Device 4**
This device sits inside the meter can and has an indicator light bolted to the side or the front of the meter can.

**Device 5**
Two lights located on the top of the device.

**Device 6**
One light on front of the device.

Please call if you have questions or see issues with your device.
